

# ETHBULL

THE OFFICIAL MEME COIN OF  
THE ETHEREUM BULL RUN

\$ETHBULL Whitepaper

# ***ABSTRACT***

Ethereum (ETH) remains one of the most transformative blockchain platforms, redefining the landscape of smart contracts and decentralized applications. \$ETHBULL Token is a meme token born from the anticipation of Ethereum's next major price rally. It captures the spirit of this pivotal moment, as bullish momentum for Ethereum intensifies in 2025 and it emerges as the leading cryptocurrency token, surpassing even Bitcoin.

Created for the upcoming Ethereum bull run, \$ETHBULL Token blends meme culture with real market relevance. It unites the crypto community in celebrating Ethereum's upward trajectory, offering a fun and engaging way to ride the wave. By harnessing collective excitement and aligning with Ethereum's continued growth, \$ETHBULL Token invites holders to be part of a movement aiming toward new all-time highs.

# ***TOKEN IDENTITY & VISION***

## **What is ETH Bull Token?**

\$ETHBULL Token is a community-powered meme coin created to ride Ethereum's surge toward \$20,000 and beyond. It's the ultimate bet on ETH's next parabolic run, with a mission to rally a global audience of believers and meme coin enthusiasts.

With \$ETHBULL, you're not just holding a meme token – you're part of a movement inspired by Ethereum's role in decentralized innovation. The project incentivizes community participation through ETH-linked rewards and themed milestones.

# WHY \$ETHBULL?

- **Free ETH Airdrops:** Token holders can receive ETH airdrops as Ethereum reaches specified price targets. Users simply need to link their purchased wallet and meet social or trading criteria.
- **Community-Weighted Airdrops:** When ETH hits \$10,000, a 10% supply airdrop will be distributed based on wallet activity, token purchases, and community involvement.
- **Ethereum-Linked Momentum:** \$ETHBULL token is a high-beta Ethereum play – meaning as ETH trends upward, ETH Bull amplifies that momentum.
- **Deflationary Design:** With every \$500 increase in ETH price, a portion of \$ETHBULL tokens are permanently burned, reducing supply and increasing scarcity.
- **Ethereum Reliability:** As the most established and widely used blockchain, Ethereum serves as the foundation for thousands of cryptocurrencies, tokens, and decentralized applications. Its robust infrastructure powers a significant portion of the entire crypto ecosystem, earning it the reputation of being “digital gold” in the blockchain world. This deep-rooted reliability makes Ethereum the ideal base for a meme token built to ride the next wave of market momentum.

# ***MARKET NARRATIVE: THE ETHEREUM BULL RUN***

## **Historical Context**

- 2016 – 2018: ETH rose from \$10 to over \$1,300, driven by ICOs and early adoption.
- 2020 – 2021: The DeFi and NFT boom saw ETH climb to over \$4,800.
- 2023 – 2024: Ethereum reclaimed bullish momentum, breaking past \$3,500 amid rising Layer 2 adoption and ETH ETF speculation.

## **Current Outlook**

Institutional adoption, upcoming scalability improvements, and renewed interest in decentralized applications are propelling ETH back into the spotlight. Pro-crypto regulatory changes in 2025 have cleared the path for Ethereum to potentially surpass all previous highs, with projections ranging towards \$10,000 and beyond.

## **Project Highlights**

- **Token Burns** at key ETH price milestones (\$5K, \$6.5K, \$8K).
- **ETH Airdrops** at \$4K, \$4.5K, \$5k, \$6K, \$7k, \$8k and \$9K.
- **Final Airdrop** at \$10K ETH, 10% of the total \$ETHBULL token supply will be distributed amongst all token holders based on proportion of overall holdings

# ***COMMUNITY & TEAM***

## **Team**

The team behind \$ETHBULL token consists of highly experienced crypto investors and blockchain advocates, each with a track record of success in navigating the digital asset space. Their shared mission is simple but powerful: to create life-changing wealth opportunities for everyday participants by building a transparent, community-first project that aligns with Ethereum's explosive growth potential.

With deep expertise in tokenomics, decentralized finance, and smart contract development, the team is committed to ensuring that every buyer has the opportunity to profit. Holders of \$ETHBULL token will be eligible for free ETH airdrops as Ethereum reaches major price milestones. These distributions are fully verifiable on the blockchain, providing complete transparency and on-chain proof of fairness and integrity.

To further demonstrate their long-term commitment and alignment with the community, the team has voluntarily locked their token allocations for a minimum of 6 months following public exchange listing. This ensures that no team member can trade, sell, or transfer any tokens during the initial market phase, eliminating any risk of early dumps and reinforcing trust with investors.

The \$ETHBULL community is composed of passionate Ethereum supporters, developers, and meme coin innovators. Join the conversation on social platforms and celebrate Ethereum's growth alongside others who believe in the decentralized future.

# ***Smart Contract Audit***

The \$ETHBULL smart contract, encompassing both presale and staking functionalities, has undergone a rigorous audit by SolidProof, a globally renowned leader in blockchain security. This thorough evaluation ensures the utmost confidence for investors purchasing \$ETHBULL, reinforcing its credibility as it prepares for listing on the world's premier cryptocurrency exchanges. Secure your investment in \$ETHBULL today and join a trusted, future-ready project poised for success.

# ***\$ETHBULL ROADMAP***

## **Phase 1: Birth of \$ETHBULL**

- **Website Launches:** The \$ETHBULL website goes live, open to all to be part of the \$ETHBULL community with the option to receive minimum 100 returns on initial prices
- **Contract Is Drafted:** The core code for \$ETHBULL tokens is carefully designed, guaranteeing security and seamless operation across the site and user wallets
- **Social Media Accounts Are Created:** The launch of our community hubs, where Ethereum fans and crypto explorers connect to discuss \$ETHBULL

## **Phase 2: Development**

- **Presale Starts:** A unique chance for early supporters to join \$ETHBULL's journey to ATHs and be rewarded with Ethereum airdrops
- **Contract Audited:** Guaranteeing top-tier security and dependability of our smart contract with thorough audits by leading industry experts.
- **Community Expands:** Get ready for epic social events and bold campaigns that spark a thriving, all-in \$ETHBULL community

## **Phase 3: Global Marketing**

- **Marketing Intensifies:** A dynamic blend of classic and bold guerrilla marketing to ignite buzz and spread \$ETHBULL everywhere
- **CoinGecko and CoinMarketCap Submission:** Boosting \$ETHBULL's presence by launching on top crypto tracking platforms for maximum exposure
- **Community Expands:** Get ready for epic social events and bold campaigns that spark a thriving, all-in \$ETHBULL community!

## **Phase 3: \$ETHBULL Expansion**

- **Initial DEX Listings:** \$ETHBULL token listed on DEX, allowing global purchasing on a crypto exchange, catapulting \$ETHBULL to record highs!
- **\$ETHBULL2 development:** Creation of \$ETHBULL2 token to further solidify Ethereum's presence in the crypto world
- **First CEX Listings:** Listing on the world's largest crypto exchanges, with unlimited potential for coin development

# ***STAKING***

Built on Ethereum, \$ETHBULL token features a staking mechanism to reward long-term holders. Early participation earns higher APY, with rewards scaling based on staking duration and network engagement.

## **Staking Benefits:**

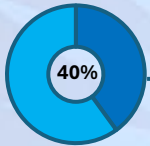

- Passive income in \$ETHBULL token tokens
- Transparent and secure via Ethereum smart contracts
- Contributes to a stronger, more committed holder base

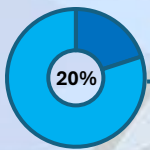

# TOKENOMICS

**Total Supply:** 120 billion \$ETHBULL tokens, a nod to Ethereum's aspirational dominance.

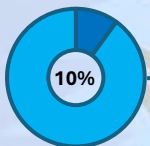

## Token Allocation:

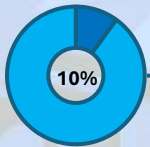

**Presale Allocation (40%)** – For early adopters of \$ETHBULL, creating the community and thriving in the presale at the lowest possible prices, with initial presale stages offering minimum 100X returns against listing price

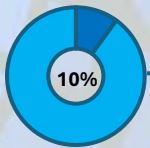

**Exchange Liquidity (20%)** – Helps maintain consistent trading activity across decentralized (and potentially centralized) exchanges

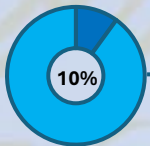

**Burn Milestones (10%)** – Set aside for permanent \$ETHBULL burns triggered whenever Ethereum reaches key price milestones.

**Airdrops (10%)** – Allocated to reward dedicated holders with ETH airdrops at key Ethereum price milestones – including a major 10% \$ETHBULL supply airdrop once ETH hits \$10K.

**Staking Rewards (10%)** – Users who stake and lock their tokens earn rewards through a dynamic APY model that boosts incentives for early adopters

**Marketing & Outreach (10%)** – Implementing social media campaigns and boosting brand visibility to sustain momentum and encourage adoption
